Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
US 20040176990	A1		12	G06F-017/60	

Abstract (Basic): US 20040176990 A1

NOVELTY - The method involves **purchasing re-sellable future** for the goods or services, which is a contract for purchasing specific quantity of the goods or services from a seller at a set price and expiration.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(1) computer readable medium storing program for **purchasing re-sellable future**; and

(2) system enabling trading of futures contract for purchase of good or services.

USE - For trading of futures contract for purchase of goods or services using personal computers, laptop computer, notebook computer, palm top computer, network computer, processor controlled device through internet, etc.

ADVANTAGE - Sellers are provided with additional flexibility to attract purchasers, to **guarantee prices** to avoid risk of falling **prices** and to **guarantee** that their good or service can be bought with additional revenue sources through sale of futures.

DESCRIPTION OF DRAWING(S) - DESCRIPTION OF DRAWING - The figure shows a flowchart illustrating the method of trading a **future** contract for the **purchase** of goods or services.

Abstract (Basic): US 20040143502 A1

NOVELTY - The method involves storing data for a price and an information identifying a consumer in a database, and inputting another price for an item or a service after a particular time of the storing the price. Two prices are compared upon determination that a price inputted is lower than the latter value. A money-value difference between the prices is calculated and refunded to the consumer.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(A) a computer program product comprising a computer storage medium having a computer program for guaranteeing a consumer a best price of an item or service

(B) an apparatus for **guaranteeing** a best **price** to a consumer for an item or service purchased at a price at first time from a vendor in a transaction.

USE - Used for guaranteeing a consumer a best price on an item or service purchased from a vendor in a transaction (claimed).

ADVANTAGE - The method assures the consumer that an item purchased will not be sold in the near **future** at a discount or **sale** price which is not made available to the consumer.

DESCRIPTION OF DRAWING(S) - DESCRIPTION OF DRAWING - The drawing shows an item or service **price guaranteeing** method.

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
US 20040128226	A1	17	G06F-017/60		Provisional application US 2002434819 Provisional application US 2003438090

Abstract (Basic): US 20040128226 A1

NOVELTY - The vehicle option premium is calculated based on the vehicle pricing information relative to the **future purchase** or sell of a vehicle, in response to the receipt of the vehicle pricing information from a user. A payment transaction is performed if the user accepts the offered vehicle option premium, and if not the user is suggested to revise pricing information or to terminate.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for the following:

(1) computer program product comprising usable medium storing vehicle option determination program; and

(2) computer system for determining vehicle option.

USE - For determining option of motor vehicle and vehicle used for transporting goods, services and passengers, over network e.g. internet connected to central controller and terminals of manufacturer, dealer and purchaser.

ADVANTAGE - Enables to provide a motor vehicle purchaser with a certain **purchasing** the price in the **future** and a certain selling **price** of the **same** vehicle in future. Enables to provide the total ownership cost of vehicle to a purchaser and predictable capacity planning to manufacturer by considering the number of vehicle option soled.

DESCRIPTION OF DRAWING(S) - The figure shows the flowchart the explaining the initiation of a transaction in the dealer terminal or through internet.

AU 2002310565	A1			G06F-017/60	Based on patent WO 2003100675
---------------	----	--	--	-------------	-------------------------------

Abstract (Basic): ZA 200107085 A

NOVELTY - Software executable on a supplier computer may record a starting price for a product and receive its binding on-line purchase offers from buyers forming part of a buyers group. The software may complete the sale transactions at a future end price that is the same as or lower than that start price and determined by a number of buyers, when one of a set period of time has expired and a minimum sales price for the product is achieved.

USE - For purchasing of goods or services over electronic communication networks such as the Internet.

ADVANTAGE - Allows all the buyers wishing to buy cases of red wine to join forces in a buying group that is formed specifically to gain bulk buying power for the purpose of driving the price of the product down. Results in labor, freight and administrative cost savings to the supplier as the purchase of the cases of red wine by the buyers in the buying group can generally be dealt with by the supplier as a bulk sale. Assists suppliers in maintaining suitable stock levels of the their product. Assists in providing suppliers with advance warning of large orders.

Abstract (Basic): WO 200104779 A2

NOVELTY - The method involves establishing a user database with a set of categories. Virtual documents with the associated attribute files are received in the network computer and categorized according to the associated attribute file. The information is stored in the set of categories in the user database according to the information within the

attribute file.

DETAILED DESCRIPTION - INDEPENDENT CLAIM is also included for the following:

(a) a database host;

(b) and a method for conducting on-line marketing campaign.

USE - For managing user's virtual documents e.g. merchant coupons, product warranties, sales confirmations and receipts, product instructions, service instructions, rebates, gift certificates, product registration cards, event tickets and credit card statements in computer network.

ADVANTAGE - Improved system which provides user convenience in clicking the banner ad and organize the offer using personal virtual retail collateral document organizer for later redemption with the merchant and destination site **benefit**. Enables user to accept the **offer** at later convenient time as the merchant performs **another sale**. Allows manufacturers or service providers to provide click links to user homepages.

DESCRIPTION OF DRAWING(S) - The figure shows the block and schematic diagram of the network which applies virtual retail collateral document organizer.

AU 200069088 A G06F-007/00 Based on patent WO 200113216

Abstract (Basic): WO 200113216 A1

NOVELTY - A first price and information identifying the consumer (114) is recorded by a host system (252); sales prices of subject matter is monitored and noting any lower price by the host system for a predetermined period after first transaction; money-value difference between the first price and lower price is calculated; and host system refunds the consumer an amount equal to the money-value difference by crediting account of the consumer.

DETAILED DESCRIPTION - The subject matter is purchased via a host system, and the guaranteeing is effected with no post-transaction action item by the consumer.

INDEPENDENT CLAIMS are also included for the following: A business system for guaranteeing a consumer a best price on subject matter purchased from a vendor in a first transaction at a first price; A computer program product; A method for electronically presenting and remitting payment of bills; and An electronic bill presentment and payment remittance system including a network.

USE - For guaranteed pricing of goods and services for a predetermined time period.

ADVANTAGE - Provides best price on goods and services purchased from a vendor so that a consumer is assured that an item purchased will not be sold in the near future at a discount or sale price which is not made available to the consumer.

DESCRIPTION OF DRAWING(S) - The figure shows a diagrammatic illustration of a bill presentment and payment system.

Consumer (114)

Host system (252)

AU 200040757 A G06F-017/60 Based on patent WO 200060519

Abstract (Basic): WO 200060519 A1

NOVELTY - The vendors selected by user is detected by server from list of vendors received from user. The HTML page including information about non selected vendors is sent to buyer for enabling buyer to select non selected vendors prior to transmission of document to selected vendors.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for computer readable program product.

USE - For enabling business to consumer transactions used in electronic commerce through internet.

ADVANTAGE - Significant commercial **benefit** to vendors that **offer** products or services in which prospective buyer is interested and has not been selected is possible, since HTML page consisting of information about non selected vendors is transmitted to buyer before **transaction** which provides **another** opportunity for user to reconsider non selected vendors.

DESCRIPTION OF DRAWING(S) - The figure shows the flow diagram of last ditch advertising process.

 AU 9948227 A G06F-017/60 Based on patent WO 9966438

Abstract (Basic): WO 9966438 A1

NOVELTY - The server of a first merchant, provides an **offer** for a **benefit** from a second merchant, to the customer on receiving an indication of items to be purchased by the customer via a web site. The offer is provided before purchase of items. If the customer accepts the **offer**, then the **benefit** is applied to the items purchased.

USE - For facilitating electronic commerce by providing cross benefit to customer during transaction.

ADVANTAGE - The customer is benefited by reduced price of his items. The first merchant is benefited by increased **sales** and the **second** merchant is benefited by acquisition of new customer.

DESCRIPTION OF DRAWING(S) - The figure shows the flow chart of the cross benefit providing method to customer.

Purchasing system with rebate feature for retail marketing - computes rebate due to each purchaser based on cost of goods and services, and transfer money to vendor

Patent Assignee: TRADEVEST INC (TRAD-N)

Inventor: COHEN J M; ROBERTSON I M

Number of Countries: 001 Number of Patents: 001

Patent Family:

Patent No	Kind	Date	Applicat No	Kind	Date	Week
US 4750119	A	19880607	US 86917894	A	19861010	198825 B

Priority Applications (No Type Date): US 86917894 A 19861010

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
US 4750119	A		11		

Abstract (Basic): US 4750119 A

The purchasing system allows for the input of purchase orders from the subscriber-purchasers for selected goods and services and correlates the transfer of funds from those purchaser-subscribers to the various vendors **selling** the selected goods. The future **benefit** guarantor supplies a rebate factor which is input into the system. The system then computes and reports a rebate which is due in the **future** to each subscriber- **purchaser** from the **future** benefit guarantor. The rebate is based upon cost of the individually selected goods and services and the rebate factor.

The system provides instructions to pay the vendors for the selected goods and services and to pay the future rebate guarantor a premium representing the **purchase price** of the **future guaranteed** rebates. Preferably, the premium is paid on a dialy basis to the guarantor and a group annuity contract is funded until the end of the fiscal year.

ADVANTAGE - Motivates consumer/purchaser to return to partic.
vendor.

Treatment: Practical (P)

Abstract: The infusion of powerful information networks into business environments is beginning to have a profound impact on the nature of governance between buyers and sellers in the marketplace. Most papers in this area emphasize the benefits to the consumer side of the equation due to reduced coordination, search, and transactional costs. The article presents a broader view of information and markets by elucidating innovative ways that sellers can survive in intensely competitive markets. The article is framed in terms of six myths and counter-myths of information technology and effective markets. The myths provide a conventional view of how increased customization and outsourcing, open architectures, a larger customer base, and low **price guarantees** will **benefit the buyer**. The counter-myths illustrate that it is altogether feasible for IT to enable supplier strategies that extract consumer surplus. For instance, suppliers could use IT to price discriminate by tailoring product offerings and charging buyers as much as they are willing to pay. They could also segment markets making comparative shopping difficult, thus avoiding the competitive equilibrium. Also, suppliers could focus on the creation of networks that lock in customers or follow aggressive pricing strategies that deter price competition. Both the myths and counter-myths are presented and examined in a polemical format using simple, fundamental economic arguments. We hope to provide provocative new avenues for discourse in this area by recognizing the complexity of interactions between buyers and suppliers in a highly networked environment. (39 Refs)

Title: Concurrency control for high contention environments

Author(s): Franaszek, P.A.; Robinson, J.T.; Thomasian, A.

Author Affiliation: Thomas J. Watson Res. Center, Yorktown Heights, NY, USA

Journal: ACM Transactions on Database Systems vol.17, no.2 p.304-45

Publication Date: June 1992 **Country of Publication:** USA

CODEN: ATDSD3 **ISSN:** 0362-5915

U.S. Copyright Clearance Center Code: 0362-5915/92/0600-0304\$1.50

Language: English **Document Type:** Journal Paper (JP)

Treatment: Practical (P)

Abstract: **Future** **transaction** processing systems may have substantially higher levels of concurrency due to reasons which include: increasing disparity between processor speeds and data access latencies, large numbers of processors, and distributed databases. Another influence is the trend towards longer or more complex transactions. A possible consequence is substantially more data contention, which could limit total achievable throughput. In particular, it is known that the usual locking method of concurrency control is not well suited to environments where data contention is a significant factor. The authors consider a number of concurrency control concepts and transaction scheduling techniques that are applicable to high contention environments, and that do not rely on database semantics to reduce contention. These include access invariance and its application to prefetching of data, approximations to essential

blocking such as wait depth limited scheduling, and phase dependent control. The performance of various concurrency control methods based on these concepts are studied using detailed simulation models. The results indicate that the new techniques can **offer** substantial **benefits** for systems with high levels of data contention. (17 Refs)

Conference Sponsor: IEEE; Southern Methodist Univ.; Univ. Texas at Dallas; et al

Conference Date: 9-13 Dec. 1990 Conference Location: Dallas, TX, USA

Language: English Document Type: Conference Paper (PA)

Treatment: Practical (P)

Abstract: The paper presents a new paradigm for replication. Its major goal is to achieve performance similar to systems that do not employ replication and, at the same time, to **offer** the availability **benefits** that result from replication. The paradigm contributes two mechanisms. The first mechanism is an extended location service, for which it uses a logically centralized implementation. In addition, it modifies the traditional transaction-processing mechanism to interact with the location service inexpensively during **transaction** execution. The **second** mechanism is a priority-based, preemptive concurrency control algorithm which allows locks to be synchronously acquired at only a single replica. In addition, the paradigm exhibits desirable availability characteristics, satisfies the one-copy serializability correctness criterion and is easy to implement. For these reasons it is presented as a basis for designing efficient and highly available distributed databases. (24 Refs)

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G)

Abstract: Apple has sold more than two million Macs, and there are people waiting in line to buy the newer machines. Ease of use is a big factor. Apple has proudly passed around independent studies showing that companies save a substantial amount of training and support by providing their staffs with Macs instead of PCs. That's fine for some users but not for all. There are a lot of people using PCs for basic word processing, data entry, and other routine tasks. In many cases, their jobs are built around using one application. Once they've learned it, they're quite productive and would reap no **benefit** from **buying** a Mac. And if they do not want a mac, they'd have a hard time justifying it to the company's bean counter. As a result, out comes the **purchase** order for yet **another** low-cost PC clone.

Title: Counting the cost of ISDN

Author(s): Buckley, C.

Journal: Datamation vol.33, no.19 p.76/26, 76/28, 76/30

Publication Date: 1 Oct. 1987 Country of Publication: USA

CODEN: DTMNAT ISSN: 0011-6963

Language: English Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: In one form or another, ISDN is imminent, but so far nobody has worked out what it will cost. Users must take a hard look at the benefits and what they are prepared to pay to use ISDN. The author does this and concludes that since the **benefits** that ISDN **offers** for voice traffic are small, very little premium on cost would be realistic. Hence the overall ISDN charge, if it is to gain user acceptance, must be virtually the **same** as the **charge** for the corresponding number of non-ISDN voice channels, plus an extra premium for high-speed data. Journal: Personal Computer no.4 p.106-7

Publication Date: April 1987 Country of Publication: West Germany

CODEN: PCSOEB ISSN: 0179-2687

Language: German Document Type: Journal Paper (JP)

Treatment: Practical (P)

Abstract: A number of tips on the buying of a used computer are given and the pitfalls awaiting the unwary purchaser are highlighted. The article distinguishes between going to a dealer, where tests and repairs may have been made, adding 15% to the **price**, but offering a **guarantee** up to 3 months, and buying on the private market. Particular regard must be paid to the condition of the display screen, and the disk-drives, including the read-write heads, must be exhaustively tested. Special care must be taken if the original documentation is no longer available; copies are somewhat suspect. A contract for purchase and sale should be entered into; details of what should appear in this agreement are given. (0 Refs)

Title: Agri-Com Systems' ag/RATION

Author(s): Forest, W.

Journal: AgriComp vol.4, no.1 p.20-4

Publication Date: July-Aug. 1985 Country of Publication: USA

CODEN: AGRCE3 ISSN: 0738-5978

Language: English Document Type: Journal Paper (JP)

Treatment: General, Review (G); Practical (P)

Abstract: ag/RATION is a least-costing program for balancing livestock rations. The program is available in versions for dairy, beef, swine and poultry, or for a combination of these classes of livestock. It requires only one disk drive, and is mostly menu driven and easy to operate. The system requirements are an IBM-PC with 192K RAM. ag/RATION offers many features of value to the stockman. The people behind the program are involved in nutrition consulting and are familiar with the farmer, especially the dairyman. On the other hand, there are other programs (such as Mixit-2) in the **same price** range that are probably more polished and may offer more features. However, the extra capacity of programs like Mixit-2 may not be needed in many ration formulation situations. **Another purchase** consideration is that ag/Ration may be less expensive if you are interested in ration formulation for only one class of livestock. The final decision will of course depend on your own needs. (0 Refs)

We study two classes of volume flexibility contracts between a supplier and a buyer, purchase contracts and take-or-pay supply contracts. Both contracts provide the buyer a chance to revisit the initial commitments based on an updated demand forecast obtained at a **later** stage.

For **purchase** contracts, we formulate the buyer's problem as a dynamic programming problem. We derive explicit optimal solutions in some important special cases. In addition, we obtain the critical value of the contract exercise cost, above which it is unwise for the buyer to sign the contract in comparison with other risk hedging approaches. Our results lead to valuable insights into better supply chain management.

Considering that the purchase contract is a real option to the buyer, we further investigate the fair price of quantity flexibility by formulating the contract pricing problem as a non-cooperative game model. Besides identifying the existence of Nash equilibrium (resp. subgame perfect Nash equilibrium) for a static (resp. dynamic) game, we also discuss the impacts of information sharing on both parties. We demonstrate that the supplier always benefits from information sharing scheme while the **buyer benefits** from it only when the supplier overestimates the true demand.

Owing to the high uncertainty in the supply and demand processes, the standard treatment of optimizing an expected objective measure may be problematic in this scenario. We study a class of take-or-pay supply contracts in a mean-variance framework. We show that a mean-variance trade-off analysis with advanced reservation can be carried out efficiently. Moreover, our study indicates how the corresponding mean-variance decisions differ from decisions for profit maximization.

AN EXAMINATION OF THE EFFECT OF OPTIONS LISTING ON THE LIQUIDITY OF THE UNDERLYING STOCKS

Author: MEHROTRA, VIKAS C.
Degree: PH.D.
Year: 1992
Corporate Source/Institution: UNIVERSITY OF OREGON (0171)
Adviser: LARRY Y. DANN

Source: VOLUME 53/10-A OF DISSERTATION ABSTRACTS INTERNATIONAL.
PAGE 3625. 109 PAGES
Descriptors: ECONOMICS, FINANCE
Descriptor Codes: 0508

I examine the effect of options listing on the liquidity of the underlying stocks. Options allow dealers in the stock market to hedge their inventory risk by **purchasing** puts. **Second**, options create incentives for informed stock market traders to migrate to the options market, thereby reducing the adverse selection costs faced by market makers in the underlying stocks. Both factors may contribute to increased liquidity in the market for the underlying stocks.

I find that percentage bid-ask spreads of the underlying stocks decline following options listing. The number of dealers registered to make a market in a stock increases following options listing. A modified Amivest Liquidity Ratio, defined as the ratio of the dollar volume of trade in a given time to the percentage **price** change in the **same** period, also increases significantly. Together, these three measures indicate greater market liquidity for optioned stocks.

The improvement in liquidity of the underlying stocks persists after controlling for changes in trading volume, price levels, returns volatility, and corresponding changes in a control sample of stocks without options. The control sample consists of unoptioned stocks that meet the price and trading volume criteria for options listing at the CBOE.

I do not find any evidence of a decline in the level of informed trading following options listing, a finding that is inconsistent with the migration of informed traders to the options market. However, I find evidence that the amount of unsystematic risk in the underlying stocks is proportional to the decline in percentage spreads. The finding is consistent with the hypothesis that options provide a means to hedge the unsystematic risk of carrying underlying stock inventories.

What's the alternative power?

Harbour, Ron;

Automotive Industries v. 179 no10 (Oct. 1999) p. 113

DOCUMENT TYPE: Feature Article ISSN: 0273-656X LANGUAGE: English

RECORD STATUS: Corrected or revised record

ABSTRACT: Fuel cells may become the alternative engine power source sought by automakers and cause drastic changes in engines and the plants required to produce them. Fuel cells appear to have the support of the major automakers and the U.S. Department of Energy and **offer** the **benefits** of battery-powered vehicles that can run longer between refuelings and can be rapidly refueled. In addition, those cells that use hydrogen as a fuel would be zero-emission vehicles while those cells that use other fuels would still be near-zero emitters. Moreover, although fuel cells are a costly and young technology, studies indicate that fuel cell automotive engines could ultimately be manufactured for around the **same price** as an internal combustion engine. However, the fuel cells currently under development have no parts in common with current power trains, and fuel cell developers would gain a major input into future vehicle design and manufacturing.

TPIPL nears debt-restrucutring deal

THAILAND: TPIPL IN DEBT RESTRUCTURING

The Nation (XBO) 04 Dec 1999 p.B2

Language: ENGLISH

Thailand's TPI Polene Plc (TPIPL) <a cement producer> has struck a framework agreement with a steering committee of creditors to restructure its controversial US\$ 1.3 bn debt. The agreement includes an equity swap, rollover to **another** five years and the **sale** of a certain stake to a new partner. It plans to boost its capital to between US\$ 180-270 mn by issuing new shares offered to a new strategic partner. Proceeds from the sale of US\$ 180 capital increased shares will be used to buy back loans through an auction mechanism and the rest will be used for the completion of its fourth cement production line. In addition, it will convert debts incurred from almost two years of unpaid interest payments into equity at the **same price** as shares offered to the partner. For the rest of the debts, it will be restructured through the rescheduling of the repayment period to another five years with an option of a three-year extension.

Unsold properties worth RM14bn as at June: Ting

MALAYSIA: RM 14 BN WORTH OF UNSOLD PROPERTIES

Business Times Malaysia (XAR) 03 Nov 1999 p.1

Language: ENGLISH

Datuk Dr Ting Chew Peh, Housing and Local Government Minister of Malaysia, announced that as at June 1999 a total of 92,000 units under various property categories have not been sold. These properties are worth a total of RM 14 bn of which are mainly higher-cost category of properties. He said that the high number of unsold properties in the country can be attributed to the poor planning of housing developers who chose unfavourable locations for their projects. **Another** reason for the weak **sales** of properties in Malaysia is also due to the cautious spending pattern of consumers as a result of the economic turmoil in 1998. The Minister said that the recent string of **benefits offered** in the 2000 Budget, mainly to enhance the purchasing power of the people, is expected to help overcome the over supply of properties in Malaysia. Among the sops include, bonuses and salary increase for civil servants, increased housing allowance for civil servants and lowering the stamp duty of transfer of houses.

Proton expects to turn around UK venture this year

UK: TURNAROUND EXPECTED BY PROTON IN 1999

New Straits Times (XAS) 07 Feb 1999 p.9

Language: ENGLISH

Mohamed Ashraf Iqbal, managing director of Proton Cars (UK) Ltd <part of

Bode Akintola

24-Feb-05

EIC 3600

Proton Malaysia>, said that its new marketing strategy is expected to bring a turnaround in car sales, which has been falling since 1993. Proton Cars recorded car sales of 4,600 units in 1998 as compared to 14,900 units sold in 1993. This is due to the heavy competition in the UK car market from Japanese and Korean cars. He said that the new marketing strategy by Proton Cars is to sell its 1999 cars at the **same price** level as quoted in 1989. This special price is also to celebrate the 10th anniversary of Proton's presence in UK. The new strategy, has brought a 100% increase in car sales which stood at 912 cars for January 1999. The company has targeted a sale of 5,500 cars in 1999 and is hoping to sell 1,200 cars by March 1999. The total number of unsold cars in January 1999 was at 1,300 units as compared to 7,000 unsold units in March 1998, which clearly indicates rising **sales**. Meanwhile, **another** new marketing initiative is the setting up of Proton Motorsports which is aimed at raising the awareness of the public on the handling capabilities of Proton cars. The company will support the 1999 British Rally Championship and Proton Coupe Cup Racing Series.

99 office supply fro 4,300,000 sq. ft

HONG KONG: OFFICE SUPPLIES WILL DROP 13% IN 1999

Sing Tao Daily (XKL) 25 Dec 1998 p.a18

Language: CHINESE

Midland Realty reported that the office supplies will drop by 13% to about 4,300,000 sq. ft. in 1999 compared with the whole 1998. Meanwhile, prices for Grade A offices in core business districts will fall up to 5% in the first quarter of 1999 as many small and medium firms will face closure during the **same** period. Office **prices** in the second quarter of 1999 will become stable as the **transaction** volumes increase. In the **second** half of 1999, prices of some high-quality offices may rise by 5-10% as a more stable economy will be seen in the same period.

Kein Freizeichen beim Versicher bers Telefon

AUSTRIA: DIRECT INSURANCE NOT POPULAR

Der Standard (XGO) 06 Jul 1998 p.14

Language: GERMAN

Insurance funds in Austria have seen little success in their efforts to sell direct insurance policies by telephone. AXA subsidiary AutoDirect observes that there are more women among the telephone customers, because they tend to be more suspicious of sales agents. In general Austrians still prefer the personal contact with an insurance agent. These agents have experienced additional pressure from clients who collected favourable conditions of direct insurance offers and urged the agents to issue policies at the **same low price**. Wiener StUdtische sees no bright **future** for direct insurance **sales** by telephone, but thinks that a stimulus might come from the Internet, although even this line has not been successful so far. Only direct car insurer Z ritel, a subsidiary of Z rich Cosmos, reports significant growth for 1998. After the first two years were slow, Z ritel now has 4,500 clients - half of them gained in 1998. Advertising efforts are beginning to stick, and customers are increasingly recommending Z ritel to friend and acquaintances, which is now boosting business. Z ritel now considers offering also life and household content insurance.

Playing cards tight

AUSTRALIA: PREFERENCES OF CREDIT CARD HOLDERS

The Australian Financial Review (AFR) 04 Jul 1997 P.54

Language: ENGLISH

Market researches on credit card holders in Australia have revealed several interesting findings. First, card holders are more clear-headed of what they want regarding the terms associated with credit cards. Most of them prefer to pay annual fees upfront to individual **transaction** charges.

Second, a large proportion of Australians possess 2-5 cards. Third, Australians are replacing some cards like Bankcard with multiapplication and co-branded cards. Fourth, card holders are neutral towards chip technology and the older strip system. They are more particular on features such as simplicity, security, convenience and the presence of incentives. Fifth, consumers are only loyal to cards that **offer** immediate **benefits**. Sixth, card holders today are more well-informed about the charges than the past.

DIFFERENT CONVERSION RATES USED FOR FOREIGN CREDIT PURCHASES

UK - DIFFERENT CONVERSION RATES USED FOR FOREIGN CREDIT PURCHASES
Times (TS) 8 July 1989 p27

Different foreign exchange conversion rates are used by the various credit card concerns when billing customers, according to C Campbell, writing in The Times. Overseas travellers are advised to use as many different cards as possible, and to compare the spot market rate against that used by the credit card concern on the day the amount is posted to the customer's account. The credit concern's exchange rate used can differ from the general exchange rate range for the day. In addition, a single check revealed a significant difference between the total sterling cost of several **purchases** in **another** currency as charged by Barclaycard vs a lower cost which would have been **charged** for the **same** amount converted by Access.
